

Claims

1 - 6. (Cancelled)

7. (Currently Amended) A cigarette filter, comprising:

a cigarette holder body including filter materials arranged therein,

wherein two filter materials are provided, and a mixture of activated charcoal and silica/alumina is loaded in a space between the two filter materials or is dispersed in one of the filter materials, and wherein a total amount of the mixture of activated charcoal and silica/alumina is set to 30 mg to 120 mg.

8 - 13. (Cancelled)

14. (New) The cigarette filter according to claim 7, wherein 30 mg of activated charcoal and 30 mg of silica/alumina are loaded.

15. (New) A cigarette filter comprising: filter sections including filter materials individually wrapped with plug wrap paper; forming paper for wrapping the filter sections integrally; and tipping paper covering the forming paper so as to contact the filter sections to a cigarette section to form a cigarette,

wherein two filter materials are provided, and a mixture of activated charcoal and silica/alumina is loaded in a space between the two filter materials, and wherein a total amount of the mixture of activated charcoal and silica/alumina is set to 30 mg to 120 mg.

16. (New) The cigarette filter according to claim 15,
wherein 30 mg of activated charcoal and 30 mg of silica/alumina are loaded.
